

Technical Reference

Capstone Remote Monitoring System (Maintenance Edition)

This document (plus the User Edition), presents the additional capability to monitor, control, and troubleshoot the MicroTurbine via the Capstone Remote Monitoring System (CRMS) software.

General Description

CRMS Maintenance Edition provides the features described in the CRMS User Edition, plus the features outlined on the following pages.

Chapter 2: CRMS Overview

This chapter presents a general overview of the maintenance portion of CRMS.

Additional Features

The additional CRMS Maintenance Edition features are listed below:

- OEM Manufacturer Option
- Detailed Parameter Monitoring Capability (Maintenance Level)
- Fault Tracing
- Incident History
- Intra Device Faults
- Fuel Solenoid States
- Software Upload
- PM Uploading
- PM Downloading

Standard Conventions

The following conventions are used in this document:

- bold** Bold denotes text or characters you should literally enter from the keyboard. This font is also used for the proper names of disk drives, paths, directories, control command buttons, filenames, and buttons and field names within CRMS panels.
- [path]** Square brackets indicate nested menu items and dialog box options to a final action. The sequence **[Start] [Programs] [Capstone CRMS]** directs you to select **Start** item, select **Programs** item, and finally, select **Capstone CRMS** item.
- paths** Paths in this chapter are denoted by backslashes (\) to separate drive names, directories, and files, as in the following path:
Drive:\dirname1\dirname2\myfile
